

# FRESHLY ROLLED OUT: OUR NEW ROLLER BLIND COLLECTION

# NEW LEADING ROLES

With its new roller blind collection, Création Baumann gets textiles in private and public spaces to roll. The novelties combine innovative functionality with sophisticated aesthetics.

## THE TEXTILES

The collection focuses on wider fabric applications of 270–300cm, opening up new possibilities for large glass surfaces. Choose from eleven new textiles, including new products for acoustics, glare and heat protection. Our SINFONIA R and UMBRIA R classics present themselves in a fresh range of colours. Four digital print designs and two laser designs round off the collection.

## THE TECHNOLOGY

The battery-driven ECOTRIC RTS system was replaced by a quieter motor with integrated rechargeable battery and is now available as ECOTRIC ACCU RTS. Further technical features include cordless installation, smart home-readiness and remote control. This provides you with a host of operating options—manually, using normal or rechargeable batteries and direct connection to a power supply.

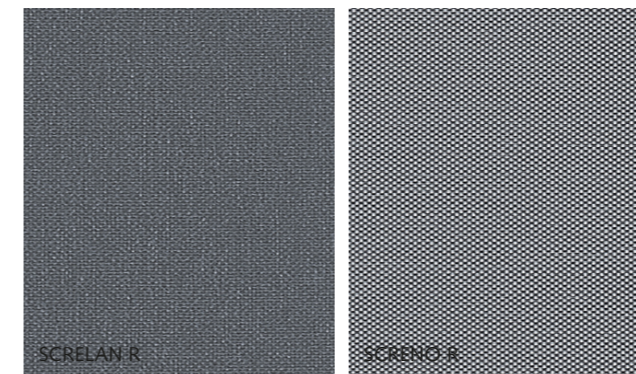

LASER BRANO R auf Master Medium Col.7067

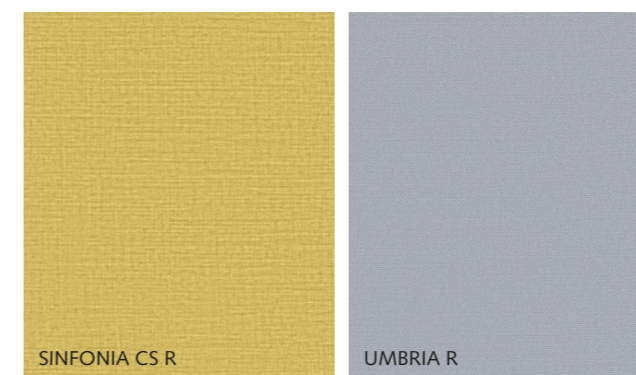

## ACOUSTIC FUNCTIONALITY

The SILENT R and VINTEA R acoustic novelties expand the product range of sound-absorbing roller blinds. SILENT R, a highly functional fabric, excels in a sound absorption coefficient of 0.7 and its Recto / Verso application option. VINTEA R is a sheer acoustic roller blind fabric in a matte finish with a digital vintage floral print.

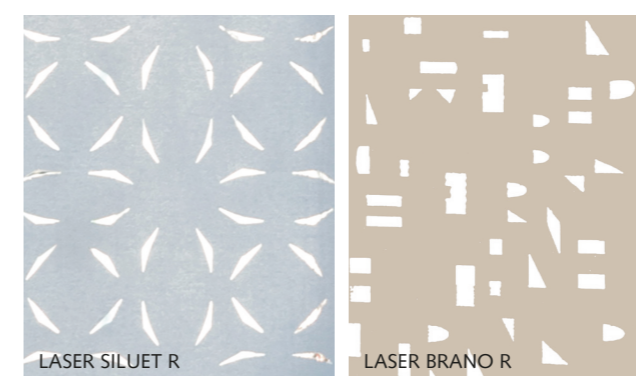

## GLARE AND HEAT PROTECTION

SCRELAN R and SCRENO R, two plain screen weaves with fine textures, have very good glare and heat protection properties. With its mottled texture and textile feel, SCRELAN R lends cosy atmosphere to any room. As a contrast, SCRENO R captivates with its factual, technical character in five different hues.

## CLASSICS IN NEW COLOURS

The plain SINFONIA CS R and UMBRIA R textiles present themselves in new ranges of colour. SINFONIA CS R is available in 13 colours, the compact UMBRIA R in 25. Both roller blind fabrics can be combined with the curtain fabrics of the same name—for a harmonious interplay of roller blinds and curtains.

## VERSATILE LASER DESIGNS

LASER SILUET R and LASER BRANO R add two new laser designs to the new roller blind collection, creating a special play of light and shade and enabling numerous combinations of staples and colours.

Coordinated staples: MASTER MEDIUM R, SHADE R, SINFONIA CS R, SPIDER FR R (only for Laser Brano)

## MULTIFACETED DIGITAL PRINTS

The new digital prints open up creative scope. LIANA R impresses with its vertical print motif inspired by the plant kingdom. BRANOLINO R presents itself in a timeless all-over pattern of block letters and is available in three colour combinations. FORMS R is printed with large-scale oval objects reminiscent of polished stones.

**CRÉATION BAUMANN** Where light and space meet, Création Baumann systems ensure a perfect balance of aesthetics and function. This is backed by a unique art of weaving, making the Swiss label a globally leading textile brand, and the expertise to transform world-class fabrics into outstanding systems.
