

Healthcare

Bara-no-izumi Women's Clinic – Matsuyama

A rose garden in the middle of the birth clinic thanks to the curtain design.

Starting Point

A new birth clinic was constructed on the site of a previous rose garden.

Solution

Modelled on the former rose garden, Création Baumann's digital printing ROSE VOILE with rose design was selected. The flowery but not tacky design gives the room the impression of a rose garden year-round. It harmonises perfectly with the simple architecture.

Expecting mothers and mothers with newborns meet in this wonderfully harmonious room to spend some downtime.
