Ota Civic Hall – Ota

Highlighting the assets with the right materials.

Starting Point

Ota Civic Hall is a public theatre complex consisting of a hall, a studio and several multi-purpose rooms. With this building, the interior designers focused on texture, colour and materiality to highlight the object's simple beauty.

Solution

STEEL TEX II was exclusively used for the foyer of the Ota Civic Hall. The metallic texture and the fine stripy look of this semi-sheer fabric take up the building in its design while ensuring optimum heat and glare protection on the object's interior.
