# Ota Civic Hall – Ota

Highlighting the assets with the right materials.

## Starting Point

Ota Civic Hall is a public theatre complex consisting of a hall, a studio and several multi-purpose rooms. With this building, the interior designers focused on texture, colour and materiality to highlight the object's simple beauty.

## Solution

STEEL TEX II was exclusively used for the foyer of the Ota Civic Hall. The metallic texture and the fine stripy look of this semi-sheer fabric take up the building in its design while ensuring optimum heat and glare protection on the object's interior.

## Object

Ota Civic Hall, Ota, Japan

## Concept

Kohyama Atelier, Tokyo, Japan
