Residence of the Consul in Rio de Janeiro

Swiss design meets Brazilian joie de vivre: textile solutions for the consul's residence in Rio de Janeiro.

Starting Point

The residence of the consul in Rio de Janeiro combines Swiss elegance with Brazilian joie de vivre. The result is an inviting environment for negotiations and festive occasions. Swiss design characterises the furniture, textiles and lighting, while the colours and patterns are inspired by the Copacabana promenade. Flexibility in the furnishings enables a wide variety of utilisation scenarios.

Solution

Special attention is paid to the specially created curtains that adorn the residence. These curtains are made from SINFONIA CS curtain fabric, the design of which is customised using digital printing. Made in Swiss Design, they reflect the vibrant surroundings of Rio. The flexibility of the furnishings not only allows them to be customised for different events, but also creates an atmospheric ambience thanks to a sophisticated lighting concept.
