Techtextil Swisspavillon – Frankfurt

Swisspavillon at Techtextil: a role model for functional and sustainable exhibition stand construction.

Starting Point

In collaboration with Switzerland Global Enterprise, Swiss Textiles is organising the joint stand for Swiss companies, research institutions and educational institutes at Techtextil in Frankfurt. The trade fair is known as a driver of innovation and showcases both the global textile future and the potential applications of textile technologies.

Solution

The fact that Switzerland is a centre of excellence for textile solutions was also reflected in the stand design. The association favoured functional and reusable materials. The ACOUSTIC DIVIDER VARIO acoustic partition curtain was used instead of walls. This is characterised by its high sound absorption and can be reused for the next trade fair appearance.
